Since joining AES in 2015 Rewa an interest in assisting with planning for new developments and determining suitable mitigation so that new activities can operate harmoniously with existing environments. She is also passionate about creating great acoustic environments through building design and has recently been involved with the development of the Ballantynes Stables Building and the new St Patricks Church Building as well the Matuku Takotako, Sumner Library and Community Centre and

Rewa also has experience in apartment buildings including the Luxury Cranmer Gardens development, and the innovative Uku and Kerewhenua buildings in the Kerepeti development at Hobsonville.

Rewa has a background as a small business owner which gives her a broad understanding of wider concerns of clients and what her part in creating a good acoustic environment brings to the community. She also understands the importance of budgetary issues and constraints.

Other diverse projects Rewa has worked on include assessment of environmental noise effects of a number of new hospitality sites, pre-schools, providing assessment of potential noise effects and noise management plans.
